

## Hughes Poster Flex Art

Final Size	Height	Width
Production Size	10'5"	22'8"
Mechanical Size	12.5"	27.2"

### Art Submission Requirements Layout –

We will accept pdf, jpg, ai, or any other std graphics file, as long as they are created at the mechanical size above. We ask that you create your files using at least 288ppi.

It is not necessary to provide bleed in your artwork. We will add bleed as necessary to your files. However, please consider giving your critical elements a comfortable margin from the edge. Also, please do not add rule lines or any additional information to the file that you do not want to print on your final poster.

**Finishing Instructions** - The printed vinyl is not wrapped around the billboard face, but attached under a 2" stainless steel trim border. For this reason, the overall size of the finished vinyl is extremely important. The overall finished size should be 10'-7" x 22'-10" including the pockets. If this size is exceeded, the vinyl will be too large for the panel and cannot be fully tightened. Finished size of the vinyl should be 10'-7" by 22'-10" with 2" Live Pockets.

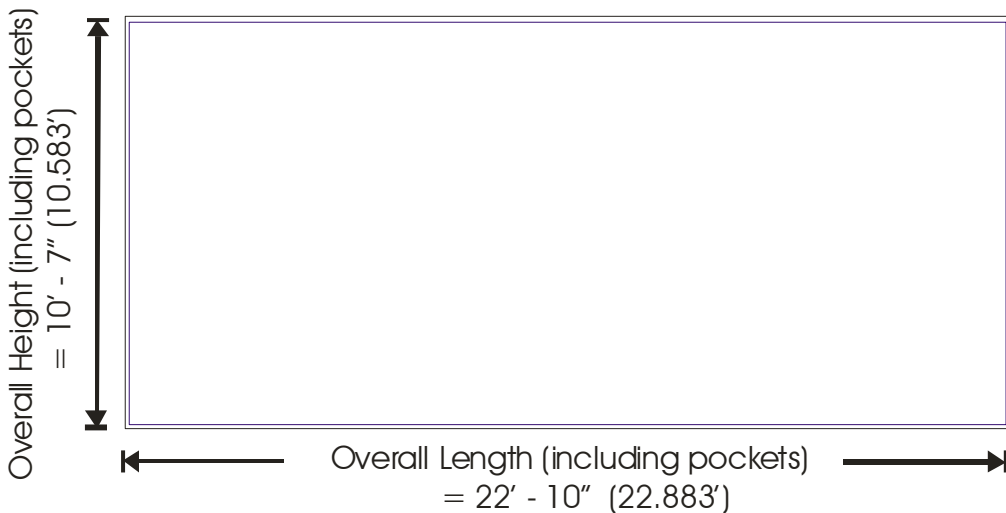

## FX-6 Billboard Printing instructions

The Hughes Outdoor FX-6 Panel is different than a traditional “wrapped” vinyl.

The printed vinyl is not wrapped around the billboard face, but attached under a 2” stainless steel trim border.

For this reason, the overall size of the finished vinyl is extremely important. The overall finished size should be 10’-7” x 22’-10” including the pockets. If this size is exceeded, the vinyl will be too large for the panel and cannot be fully tightened.

**Tell your printer that the finished vinyl should be 10’-7” x 22’-10” including live- bleed pockets.**

**If there are any questions please have the printer call Steve Hughes at 804-784-0501 or e-mail to [steve@hughesoutdoor.com](mailto:steve@hughesoutdoor.com).**
